Why i-Assure?

- Smart content management system for corporate policies and procedures.
- IOTIZED QHSE.
- %100 integration ready with line of business applications and ERP.
- Seamless System Alerts.
- live SMS, Email, Mobile App notifications.
- End to End QHSE Mobility solution.
- Incidents Reduction Pro Active Solution.
- Live control room for QHSE Assurance.
- Real time Quality control video capturing.
- Real Time Temperature Monitoring.
- Real time Smoke detecting.
- Real Time Fleet Tracking.

Purpose of the system

- SMART QHSE - QHSE stands for Quality, Health, Safety and Environment. The function of the QHSE department is that to maintain all these four standards. If they find anything missing in any of these standards then they need to take immediate preventive action and think of a long term solution for that problem so that such incidents can be avoided. To fix this they need a proactive approach for Viewing and analyzing the critical findings and reduce them in future once for all.
- FIRST TIME RIGHT JUST IN TIME SOLUTION - To attain the aforesaid any business needs the track of record of the incidents. To get these records or references we need a solution which gives these references in no-time duration for the concerned officials to take the immediate decisions immediately to prevent the incidents before it happens.
- i-ASSURE SYSTEM THAT LEARNS AND IMPROVES AUTOMATICALLY: i-Assure keeps the track of every incidents and action taken for those incidents or Near-miss and the status of those actions. This helps the officials to analyze the gaps (if any) in the existing procedure and policies, which in turn helps the improvisation in the existing system.
- COMPLIANCE: 100% compliance with all governmental rules & regulations (ADFCA, OSHAD, Municipality, Zon-escorp, DOT ... etc.).

Future Aspects of the system

- FOCUS ON THE RED SPOT - Quick Sort incidents based on the criticality level.
- IOT IS HERE- This is an IOT Era (Internet of Things) where features like temperature monitoring, smoke monitoring and fleet management are done through specialized sensors. In i-Assure we have the framework to communicate with these sensors to capture the real time data of Smoke, temperature and location to create proactive alerts and analysis mechanism for the QHSE personnel to be more productive on their job.
- AUTOMATED WASTE MANAGEMENT - Accurate Waste management is done through integrating the waste weighing data from the specially designed digital weighing scales where the weighing data is automatically transferred and captured in i-Assure.
- ROI – Protecting lives of people, safety of assets and quality of production / manufacturing are the strategic targets of i-assure through which we can attain profitable business growth and guaranteed ROI.
